enPowerManager

Energy Conservation Tool

- ✓ **Remotely govern energy usage of PCs**
- ✓ **Schedule PCs for off hour shut down**
- ✓ **Program boot up at start of work days**
- ✓ **Automate restarts after installations**
- ✓ **Conserve energy and reduce costs**

Introducing Power Management for Your Network!

enPowerManagement provides an effective tool for energy management across an enterprise. Conserve energy, reduce costs, and help protect the environment—all from the central CurrentWare console!

✓ **Govern Energy Usage:**
Administrators can manage energy consumption of all company PCs remotely.

✓ **Schedule Shutdown:**
Reduce energy usage and decrease costs through scheduling shutdowns during off hours.

✓ **Manage Boot Up**
Minimize energy expenditures by scheduling automatic boot up of systems at the start of work times.

✓ **Remote Energy Management:**
Ability to remotely control the power functions of your workstations.

Energy Facts

✓ After lighting, computers and monitors have the highest energy consumption in office environments. Studies have shown that power management of computers and monitors can significantly reduce their energy consumption, saving hundreds or thousands of dollars a year on electricity costs.

✓ Approximately half of all office computers are left on overnight and on weekends. Evenings and weekends account for 75% of the week, so ensuring computers are turned off at night dramatically reduces their energy consumption.

CurrentWare

enPowerManager

**Energy Conservation Tool**

Supported Operating Systems:

CurrentWare Server/Console:
Windows 7, 8, 10
Windows Server 2008, 2012

CurrentWare Client:
Windows 7, 8, 10
Windows Server 2008, 2012

"The one thing that made me really choose CurrentWare over the other products is the design of the software and the customer service. They also try build the software from feed backs of users and in the next updates certain features will be added or removed to customers' needs."
